Description

Antiseptic cream, with a special blend of natural plant-based oils, herb extracts and pure essential oils like calendula, chamomile, tea tree, protects, calms, restores and hydrates your skin with a mild antibacterial action. Especially made for treating acne, pimples, rashes and spots. The oil based ingredients might sound contra dictionary and you might think that using oil on oily and acne prone skin will make your skin worse or clog skin pores, when in fact the opposite is true. Natural oils help balancing your skin with no side effects.
