Description

Our Chamomile oil is obtained from chamomile petals infused in bio-virgin olive oil, and is naturally rich in a-bisabolol, azulene and flavonoids. It helps promote fast healing and skin regeneration.
Chamomile oil has anti-irritant and anti-inflammatory properties and is therefore most commonly used for its calming ability for red, dry and irritated skin, sunburn, diaper rash, hypersensitivity as well as calming allergies, eczema, psoriasis. It also has mild antiseptic properties and is therefore also excellent for the daily face care, for it cleanses skin's pores from impurities. Though chamomile is very mild and can be used even on the delicate baby skin, some people may show sensitivity to chamomile. It is advised to first try a small amount on the skin and see if any allergic reaction occurs.

USE

Although herbal oils are not altered, it is recommended to use within 1-2 years for the best herb efficiency.
